## Product Information

This Loving Leaves biodegradable grecian cremation urn is made of handmade biodegradable material. These urns are suitable for ground burial or displaying in your home. **Biodegradable bag not included. Due to the nature of this handmade product, color and pattern may slightly vary.**

### Biodegradable Eternal Embrace

Turn pictures, art, and words into a beautiful Biodegradable Eternal Embrace Wood Heart Urn Pendant. Pictures and words are permanently engraved on to the pendant. This pendant is perfect for hanging on biodegradable urns that are not engravable. These pendants are made from eco-friendly materials which break down naturally when buried. They are durable, with no "shelf life" and will NOT begin to biodegrade until they are buried in the ground. Each pendant comes with a 36" natural jute cording. Jute is a soft shiny natural fiber that is made primarily of plant materials. **This biodegradable urn pendant is not fillable, and only suitable for use on an urn. Urn shown in photo is sold separately.**

Depending on the provided image, lighting and contrast, the final product will vary. Our jeweler makes the best effort possible to make each pendant the highest quality possible. **After you place your order we will send you an e-mail on where to send the photo.**

### **Optional Personalization**

An optional personalization can be done in a script or block font. Personalization can be up to 3 lines with a total of 25 characters per line. Optional artwork may also be chosen (see choices above). Personalization will be done on the back of the pendant.

The urn meets the standards of the Transportation Security Administration and can pass through gate-side security and be carried onboard an airplane.

### **Biodegradable Ground Burial**

These biodegradable urns are fabricated by hand from recycled and eco-friendly biodegradable material which breaks down naturally when buried. They are durable, with no "shelf life" and will NOT begin to biodegrade until they are buried in the ground.

### **The Environment**

Earthurns are manufactured with the environment in mind. The tree bark used to make the urn is harvested from the mulberry tree in such a way that the tree continues to grow, undamaged. This sustainable process is centuries old and ensures the preservation of ancient forests.

Once the bark of the tree is harvested, it is soaked until soft and then laid out on to bamboo screens where floral materials are inlaid by hand. The screens are then placed in the sun to dry. The resulting material is used to make beautiful and environmentally-friendly urns.
